EDUCATION

Bachelor of Science in Computer Science **Expected Graduation 2028**
Seminole State College/University of Central Florida

Relevant Coursework

Programming Fundamentals, Object-Oriented Programming, Data Structures, Web Development

Technical Skills

Languages: Python, Java, JavaScript, HTML, CSS, SQL

Tools: Pandas, Git, VS Code, Matplotlib, FastAPI,

Core Skills: Object-Oriented Programming, Debugging, Team Collaboration, Problem Solving

PROJECTS

F.A.T.E (Food Alert & Tracking Engine) | Html, CSS, JavaScript, Netlify Functions, ZXing, Open Food Facts API, Gemini API

- Built a full-stack food inventory web application that scans product barcodes using ZXing and retrieves product information through Open Food Facts API
- Designed a color-coded expiration tracking system (Green, Gold, Crimson, Red) to monitor food freshness and alert users as items near spoilage
- Developed serverless backend with Netlify Functions to integrate Gemini API, generating recipe recommendations that prioritize ingredients closest to expiration

AI Chatbot Web Application | Python, FastAPI, JavaScript, Groq API

- Developed a full stack chatbot application with a JavaScript frontend and FastAPI backend to process user conversations
- Integrated the Groq API to generate AI-powered responses through RESTful API requests
- Designed client-server communication workflows to deliver real-time conversational responses

Sales Dashboard | Python, Streamlit, PostgreSQL, SQLAlchemy, Plotly

- Built an interactive dashboard that visualized sale metrics and key performance indicators from a PostgreSQL database
- Automated dashboard updates and data processing workflows to support real-time analytics
- Created dynamic charts and reports using Plotly and Pandas to improve data interpretation

WORK EXPERIENCE

Style Team Member **Oct 2024 – Present**
Target Casselberry, FL

- Translating customer needs into tailored solutions by gathering requirements (style, fit, price) and delivering personalized recommendations, strengthening client-focused problem solving.
- Maintaining organized inventory and visual systems, reinforcing attention to detail, process consistency, and adherence to defined standards.
- Collaborating with 8 cross-functional departments to improve workflow efficiency and meet store KPIs

Technical Theatre Operator **Aug 2019 – July 2023**
Lake Mary High School Lake Mary, FL

- Programmed and adjusted lighting and sound cues to meet design requirements, applying logic-based configuration and iterative testing.
- Set up and operated complex A/V systems (lighting consoles, sound boards, spotlights) across 50+ live events, demonstrating technical system proficiency and operational reliability.
